

ENERGY POLICY

Nice-Pak International has become the leading wet wipe manufacture in the UK through innovation, product range and customer support. Our ambition is to establish this position in global markets. Carbon Neutrality either by carbon offsetting or transitioning to a post-carbon economy is an essential part of this objective.

Nice-Pak International believes that the customers we support expect that our products are produced through sustainable practices. NPI believe that using our expertise we can ensure continual improvement in achieving a high standard of Sustainable Energy Performance and reach our long-term objective of Carbon Neutrality. Therefore Nice-Pak International commits to the following Energy Strategy Pledges:

Objective One – Sustainability Targets

- Sourcing 100% of electricity from renewable energy.
- 30% Absolute Reduction in CO₂ and Energy emissions by 2025 based on a 2020 base year. This will entail us reducing our CO₂ emission to 381 tonnes by 2025.
- The remaining carbon requirement will either be full offset or replaced with non- carbon alternatives.

Objective Two – Manufacturing Focused Strategy

- Install a culture in which environmental responsibility becomes part of the everyday ethos at Nice-Pak International.
- Provide the framework for setting realistic objectives and energy targets.
- Ensure the availability of information and necessary resources to achieve the objectives and energy targets.
- Be at the forefront in relation to new energy efficiency technologies, engineering systems and practices within our sector and incorporate within our business where practical and viable.
- Support the procurement of energy efficient products and services that impact energy performance and the design activities that consider energy performance improvement.
- Promote energy awareness through education, communication and by sharing best practice. Encourage staff at all levels to become involved with and participate in energy management to minimise waste and increase efficiency.

Objective Three – Compliance Focused Strategy

- Implement an Energy Management System in accordance with and audited against ISO 50001:2018.
- Commit to ISO 50001:2018 implementation by the end of 2021.
- Comply with applicable legal requirements and other requirements related to energy efficiency, energy use and energy consumption.
- Ensure the continual improvement of energy performance and the Energy Management System (EnMS) within NPI.

Our measures of success will be through successful implementation of energy and carbon reduction objectives, ISO 50001 Certification, achieving our 2025 Sustainability Targets and for Nice-Pak International to achieve our long-term goal of Carbon Neutrality

This policy will be communicated to all staff, contractors and suppliers and other interested parties, and be available to the public through selected media.
